Fulcrum company receives Social Value Award in recognition of important contribution of health initiatives to communities across the North West

Renova – a key part of the Fulcrum family – have today been given a 'Social Value Award' by Cheshire and Merseyside Health and Care Partnership and Social Value Business, in recognition of the important contribution Renova's health centres and community initiatives make to residents across the North West of England.

Fulcrum is a leading investor in community healthcare facilities and, under the NHS LIFT Programme, has delivered more than 40 healthcare buildings across England, including 17 community health centres built by Renova across St Helens, Warrington, Knowsley and Halton in the North West.

Along with delivering quality community healthcare facilities, Renova has also developed a range of Corporate Social Responsibility (CSR) initiatives to further engage with local residents and promote the importance of community health and well-being. These include the 'Beat the scrum' partnership with Widnes Vikings rugby club to help local people "learn how to make the right choices and beat the scrum in the NHS"; and a partnership with a leading social care charity to deliver a community garden project at Newton Hospital in St Helens.

The Social Value Award given to Renova today is overseen by <u>Social Value Business</u> and <u>Cheshire and Merseyside Health and Care Partnership</u> and recognises the positive impact and social value that organisations contribute to the local communities in which they work. Further details about the Social Value Award are available here.

Fulcrum CEO Sarah Beaumont-Smith said:

"For Fulcrum, supporting community health is not just about the bricks and mortar of the buildings we deliver – it is also about reaching out to local residents and finding innovative and engaging ways to promote the importance of health and well-being. We are therefore delighted to receive this award which recognises the important contribution our healthcare buildings and CSR initiatives are making to residents in the North West."

ENDS
